Cloud Engineer and BCA undergraduate with hands-on experience in Linux system administration, Bash scripting, and cloud fundamentals on AWS. Experienced in building and managing automation scripts, deploying web applications, and working with cloud-ready architectures using PHP, MySQL, and Linux environments. Strong understanding of cloud concepts such as virtualization, scalability, and security, with a passion for infrastructure automation and continuous learning through real-world projects and internships.

Projects

Student Notes Organizer | Linux Bash Automation

- Designed and developed a menu-driven Bash scripting system to organize and manage student notes efficiently using a structured folder hierarchy.
- Automated creation, storage, retrieval, and deletion of notes through interactive shell menus, reducing manual file handling.
- Implemented directory-based categorization to keep notes well-organized by subject or topic.
- Improved command-line usability by providing clear menu options and input validation.
- Strengthened practical skills in Linux file system management, scripting logic, and process automation.
- **Tools & Technologies:** Linux (Ubuntu), Bash Scripting, File & Directory Management, Shell Utilities

User Management System | Linux Bash Scripting

- Built a Bash-based user management automation tool that allows the root user to add, delete, and list system users securely.
- Implemented permission checks to ensure only authorized (root) users can execute administrative operations.
- Automated system-level commands for user creation and removal, improving efficiency and reducing manual errors.
- Displayed system user information through script-based listing functions for better visibility and administration.
- Gained hands-on experience with Linux user accounts, permissions, and system administration best practices.
- **Tools & Technologies:** Linux (Ubuntu), Bash Scripting, User & Permission Management, Shell Commands

My Calendar Events | Web Application

- Designed and developed a full-stack web application that allows users to create, edit, delete, and manage personal calendar events efficiently.
- Implemented secure user authentication and authorization to protect user data.
- Built complete CRUD functionality with proper date and time validation to avoid scheduling conflicts.
- Designed a relational MySQL database schema to store users and event records reliably.
- Focused on clean backend logic and simple, user-friendly interfaces.
- Tools & Technologies: PHP, MySQL, HTML, CSS, SQL, Linux, Git

Invoice Generator | Web Application

- Developed a dynamic invoice generation system aimed at small businesses and freelancers.
- Implemented features for client management, product/service entry, quantity handling, tax calculation, and automatic total generation.
- Stored invoice and client data securely using a structured MySQL database.
- Improved understanding of backend business logic, data consistency, and basic financial workflows.
- Designed invoices in a clean and professional format suitable for real-world use.
- Tools & Technologies: PHP, MySQL, HTML, CSS, SQL, Linux, Gi

Education

BCA(HONS) MOBILE APPLICATIONS AND CLOUD TECHNOLOGY

June 2024 - May 2027

Kerala, India

- Concentration: Cloud Engineering
- Relevant courses: Data Structures, Operating Systems, Database Management Systems, Web Technologies, Computer Networks, Linux / UNIX Systems, Cloud Computing.

Skills

- Linux (User management, permissions, Bash scripting)
- SQL & MySQL
- PHP
- HTML, CSS
- Basic Networking, Git & GitHub
- AWS (Foundational), SQL & MySQL

Certifications

- Responsive Web Design Certification
- Database Management System Certification

Languages

- Kinyarwanda - Native
- English - Professional Proficiency
- French - Conversational

Referees

- Achamma Cherian
Assistant Professor & Head of Computer Science Department at Sacred Heart College
